The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 10/599,315	Applicant(s) EBLENKAMP ET AL.	
	Examiner SEAN P. GRAMLING	Art Unit 2875	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. **Claims 5-7** are rejected under 35 U.S.C. 102 (b) as being anticipated by *Weber* (DE 196 49 039).

3. Regarding claim 5, Weber discloses a laundry appliance comprising a housing including a stamped section 8 recessed relative to a front housing and circumferentially surrounding a loading opening 1 to a rotatably mounted drum of the appliance; a door 10 disposed on the front of the housing for closing the loading opening, an edge of the door and a surrounding edge of the stamped section forming a gap therebetween when the door is in a closed position; and an illumination device 3 disposed in the stamped section so as to be concealed behind the door when the door is in the closed position, light of the illumination device being reflected at an edge surface of the stamped section and a surface of the door edge so as to provide an illuminating ring visible at the front of the housing in the gap area (see Figure 1).

4. Regarding claim 6, the illumination device includes a light source 3 in area of a hinge 7 of the door; and an optical waveguide (4,5) having a light output surface at a periphery thereof (see Figure 1).

5. Regarding claim 7, the optical waveguide (4,5) includes a light input surface configured to provide a light-conductive connection with the light source in the area of the hinge of the door (see Figures 1 and 2).

Claim Rejections - 35 USC § 103

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. **Claim 8** is rejected under 35 U.S.C. 103(a) as being unpatentable over *Weber* (DE 196 49 039).

8. Regarding claim 8, the illumination device in *Weber* includes a diffuser (4,5) and a single LED 3 configured to back-light the diffuser and spaced at an edge of the front loading opening 1 (see Figure 1), but does not disclose a plurality of LED's. It would have been obvious to one of ordinary skill in the art at the time the invention was made to provide a plurality of LED's 3 around an edge area of the front loading opening in order to increase the overall intensity of light, and since it has been held that mere duplication of the essential working parts of a device involves only routine skill in the art (*St. Regis Paper Co. v. Bemis Co.*, 193 USPQ 8).
